PROFESSIONAL SUMMARY

Software engineer specialising in frontend development with Angular and TypeScript, with a strong focus on UI/UX. I build hand in hand with AI - Claude Code is my everyday pair programmer, and every change it suggests is reviewed and tested by hand. The bigger the problem, the more joy I find in solving it. Eager to learn - not only in technical fields but also in those that require strong soft skills. Originally from Bosnia and Herzegovina, currently based in Ljubljana, Slovenia.

WORK EXPERIENCE

Frontend Developer — May 2023 - Current

Metronik d.o.o.

- Frontend development for industrial automation and digitalization. Responsible for developing custom modules tailored to specific customer needs.
- Led frontend development of software for energy management and planning, supporting the new dynamic pricing model in Slovenia.
- Involved in software deployment, UI/UX analysis and design, and providing technical support to customers.
- Writing documentation and end-to-end tests.
- Use Claude Code as a daily engineering partner to scaffold Angular components and services, draft Cypress test coverage, and turn implementation notes into documentation - every suggestion is reviewed, tested, and refined by hand before shipping.

TECHNOLOGIES: Figma, JavaScript, Angular, TypeScript, MySQL, GitLab, Jira, Confluence, Cypress, Claude Code

Junior Software Developer - Student — Oct 2022 - April 2023

Infotrend d.o.o.

- Frontend and backend development of MES software.
- Implemented custom pixel-perfect designs from Figma on the frontend.
